HOLMARC/GEM
03.08.2021

The details called for are furnished below

G.2 MONTHLY MANUFACTURING CAPACITY

Sl No.	Category	Description	Monthly Production Capacity	Total Hours taken for completion of 1 product
1	Coating Machine	Holmarc's SILAR Coating System has been designed to automate the entire process to avoid operator fatigue and errors associated with it. In manual SILAR process, the operator has to perform hundreds of repetitive dipping into the solution and water.	8 Nos.	178 Hrs
2	Research Syringe pump	A syringe pump is a device which can either infuse or withdraw liquid samples/fluids, at user defined flow rates and with selectable target volumes. Syringe pumps with simultaneous infusion and withdrawal with opposing syringes on a single drive.	10 Nos.	99 Hrs
3	Activity Based Educational Kits for Physics	Michelson interferometer is a widely used instrument for measuring wavelength of light, refractive index of transparent materials etc. The interferometer (Model No. HO-ED-INT-06) is designed and constructed in modular fashion.	5 Nos.	112 Hrs

Sl No.	Category	Description	Monthly Production Capacity	Total Hours taken for completion of 1 product
4	Cut-off Wheel	An optical chopper is a mechanical device which physically chops a light beam into discrete light pulses. It is widely used in various optical experiments. It modulates different light sources with given frequency for their subsequent analysis.	10 Nos.	93 Hrs
5	Coating Machine	Holmarc's HO-NFES-040 model electrospinning equipment is a complete unit for Nanofiber electrospinning. It is used to make nano and micro fibers ranging from 50nm to 5 microns in diameter.	4 Nos.	363 Hrs
6	Coating Machine	Holmarc's Spin Coater, Model no: HO-TH-05 is a dedicated tabletop system to spin coat small substrates in research laboratories with well controlled spin process parameters.	10 Nos.	84 Hrs
7	Coating Machine	Holmarc's Spray Pyrolysis system has been designed for research laboratories in thin films, especially for solar cell development. The system automates various fatigue and error creating processes involved in the technique when performed manually.	4 Nos.	274 Hrs
